We believe it's critical to bring jobs to Central Delaware. Therefore, we need to have the foresight to take advantage of the new interchanges located throughout the county and use them as opportunities for economic development. These areas are primed for future growth and could be the catalyst for jobs. This is the first time in Central Delaware we have the opportunity to plan for the future. We need to be strategic with our approach and focus on jobs creators for our community.

If you believe creating jobs in Central Delaware is important, please attend both Master Planning sessions.
